SUMMARY

Computer Engineering graduate with hands-on experience building AI applications, APIs, and automation systems. Worked on Generative AI, Computer Vision, and cloud-based deployments, delivering solutions for 5+ client projects. Skilled in developing scalable pipelines, integrating ML models, and deploying applications using modern tools and cloud platforms.

EDUCATION

C.K. Pithawala College of Engineering and Technology

B.Tech in Computer Engineering

- CGPA: 8.41 / 10

Surat, India

Aug. 2022 – Jun. 2026

EXPERIENCE

Junior AI Engineer

Surat, India

Nov. 2025 – May. 2026

NexAI Labs

- Built Generative AI pipelines for garment and jewellery clients using diffusion models, reducing manual design effort by 60% across 5+ brands.
- Developed a multi-agent workflow using n8n to automate image generation and content creation processes.
- Extended the system to support AI-based video generation, improving content delivery speed by 40%.
- Deployed AI services as REST APIs using FastAPI and Docker for internal and client-facing applications.

AI Engineer Intern

NexAI Labs

Aug. 2025 – Oct. 2025

Surat, India

- Assisted in developing AI automation pipelines, including prompt workflows and API integrations.
- Supported deployment and testing of ML applications using FastAPI and Google Cloud services.

PROJECTS

Full-Stack Developer – Apple Esports ERP | React, .NET 8, PostgreSQL, SignalR, Oracle Cloud

- Built a full-stack ERP system for a gaming café chain with multi-branch support using React and .NET, with AI-assisted development.
- Implemented real-time communication using SignalR WebSockets for live system updates across branches.
- Deployed the application on Oracle Cloud using Docker, Nginx, SSL, and automated database backups.

AI CCTV Surveillance System | Python, YOLOv8, OpenCV, FastAPI, Streamlit

- Built a surveillance system with YOLOv8, alert logging, and monitoring for safety-related use cases.
- Built a dashboard with analytics, alert logging, and automated report generation.

Speech to Sign Language Converter | Python, Google Speech-to-Text, Scikit-learn

- Created an accessibility tool converting speech to sign language using ASR and ML-based mapping.

TECHNICAL SKILLS

Languages: Python, SQL, TypeScript, Java (Basic), C

AI / ML: Generative AI, Computer Vision, NLP, Deep Learning, YOLOv8, Diffusion Models, TensorFlow, PyTorch, Scikit-learn

Automation: n8n, Agent Workflows, RAG, Relevance AI

Backend: FastAPI, Flask, REST APIs, Docker, CI/CD, .NET, SignalR

Cloud: Google Cloud, AWS (EC2, S3), Cloudflare R2, Oracle Cloud

Databases: PostgreSQL, MongoDB, SQLite

Frontend & Tools: React, HTML, CSS, JavaScript, Streamlit, Git, GitHub, VS Code

CERTIFICATIONS

AWS Certified Cloud Practitioner CLF-C02

Introduction to Generative AI

SAP Code Unnati Foundation

IBM Z Day 2025: AI & Data — Security
