SUMMARY

Computer Engineering graduate with production experience building AI pipelines, cloud-deployed APIs, and end-to-end automation systems – delivering measurable outcomes for 5+ client brands. Shipped real-world Generative AI, Computer Vision, and multi-agent workflow systems on Google Cloud and AWS with a track record of 60% reduction in manual effort and 40% faster delivery turnaround. Comfortable across the full build cycle: model integration, API design, cloud deployment, and client delivery.

EDUCATION

C.K. Pithawala College of Engineering and Technology
B.Tech in Computer Engineering
• CGPA: 8.41 / 10

Surat, India
Aug. 2022 – Jun. 2026

EXPERIENCE

AI Engineer Intern

Aug. 2025 – Apr. 2026

NexAI Labs

Surat, India

- Built end-to-end Generative AI photoshoot pipelines for garment and jewellery clients – including a 5-agent n8n DAG system (Image Analyzer, Creative Director, Prompt Writer, Anchor Generator, Batch Generator) with Cloudflare R2 storage – cutting manual design effort by 60% across 5+ client brands.
- Exposed AI pipelines (including extended AI video generation via GCP Console APIs) as REST API services through FastAPI and Docker, reducing turnaround time by 40% and enabling reuse across 5+ internal and client-facing applications.

PROJECTS

Full-Stack Developer – Apple Esports ERP

Jun. 2026

Gaming Café Management System

React 19, .NET 8, PostgreSQL, SignalR, AWS

- Built and engineered a full-stack, multi-branch ERP for a gaming café chain using React, .NET, PostgreSQL, and AWS, with AI-assisted tools used to improve development efficiency.
- Implementing real-time client-server communication using SignalR WebSockets across 8 branch-scoped hubs, applying core Computer Networking concepts (socket-based communication, protocol design, real-time data synchronization).
- Deploying the system via Docker Compose (7 containerized services) on an AWS EC2 instance, with Nginx reverse proxy, Let's Encrypt SSL, and automated PostgreSQL backups for scalable multi-branch operations.

AI CCTV Surveillance System | *Python, YOLOv8, OpenCV, FastAPI, Streamlit*

2025

- Deployed a real-time AI surveillance web app using YOLOv8 achieving 90%+ detection accuracy for safety-compliance monitoring with multi-class object tracking, automatic alert logging, and image capture.
- Built a full detection pipeline with statistics visualization dashboard and on-demand PDF report generation; deployed as a serverless Streamlit app with zero cold-start infrastructure cost.

Audio Speech to Sign Language Converter | *Python, Google Speech-to-Text API, Scikit-learn*

2023

- Built an accessibility application converting spoken language to sign language using Google Speech-to-Text ASR (85%+ accuracy), mapping transcriptions to 200+ vocabulary entries via ML classification models.

TECHNICAL SKILLS

Languages: Python, SQL, TypeScript, Java (Basic), C

AI / ML: Generative AI, Computer Vision, NLP, Deep Learning, Prompt Engineering, YOLOv8, Diffusion Models, Hugging Face, TensorFlow, PyTorch, Scikit-learn

Agentic & Automation: n8n, DAG-based Multi-Agent Workflows, RAG, Agentic Pipelines, Relevance AI, Tool Orchestration

Backend & APIs: FastAPI, Flask, REST API Design, Docker, .NET 8 / ASP.NET Core, SignalR WebSockets

Cloud & Storage: Google Cloud Run, GCP IAM & Service Accounts, GCP Console APIs, Cloudflare R2, AWS (EC2, S3), Kubernetes

Databases: PostgreSQL, MongoDB, SQLite

Frontend & Tools: React, TypeScript, HTML, CSS, JavaScript, Streamlit, Git, GitHub, VS Code

Soft Skills: Hardworking, Adaptability, Fast Learner, Client Communication

CERTIFICATIONS

AWS Certified Cloud Practitioner CLF-C02 – Amazon Web Services (2026)

Introduction to Generative AI – Google Cloud

SAP Code Unnati Foundation (Python, Data Analysis, AI, SAP Conversational AI) – SAP

IBM Z Day 2025: AI & Data | Security – IBM
